

International Diploma in Microelectronics Technology

Programme Overview

The semiconductor equipment and materials industries are an integral part of the worldwide strategic industries such as telecommunications and electronics. Microelectronics is a field of engineering that deals with the miniaturization of electronic components.

It involves the design, fabrication and testing of microcircuits or Integrated Circuits (ICs). These ICs are used extensively in computers, telecommunication, audio-video products, space equipment and electronic products. The Microelectronics programme provides you with a strong foundation in the electronics and microelectronics disciplines.

Programme Outline

No	Course Title
1	Technical Communication
2	Engineering Mathematics
3	E-Commerce
4	Circuit Analysis
5	Electronic Devices & Circuits
6	Printed Circuit Board Design
7	Digital Electronics
8	Solar Cell Technology
9	Digital IC Design & Applications

Entry Requirement

High School Certificate or its equivalent

International Diploma in Business & Management

Programme Overview

In today's fast paced and highly competitive business environment management plays a role of an accelerating element in the progression of an organization. This programme will enable you to grasp management theories to solidify business essential competencies and learn to manipulate various managerial tools used to enhance business efficiency.

The overall aim of the programme is to equip students with the ability to analyze the complexities of business, enabling them to participate effectively in management decision-making and to pursue a range of career choices.

Programme Outline

No	Course Title
1	Business Communications
2	Information Systems Management
3	E-Commerce
4	Principles of Management
5	Principles of Marketing
6	Human Resources Management
7	Principles of Finance
8	International Business
9	Consumer Behavior

Entry Requirement

High School Certificate or its equivalent

About ACPM

The Association of Certified Professional Managers (ACPM) was established in the United Kingdom by a group of highly successful business executives to offer a professional management programme for working executives who need a professional qualification other than an academic BBA or MBA.

The ACPM is an International Licensing and Regulatory Professional body formed for the purpose of providing practicing managers with the opportunity to participate and to be part of the process of improving managerial performance and effectiveness in all areas of business and industrial activity.

Programme Assessment

The programme is assessed through examinations, assignments and class participation.

Programme Delivery & Intake

This is a modular programme and intake of this programme is throughout the year. Students are required to complete all modules before the award of the programme. Each module require 30 contact hours with the faculty and 30 hours of self-study.

Tuition Fee

Option 1	:		£2,500
Option 2	:	£300 X 9 =	£2,700

International Diploma in Information & Computer Technology

Programme Overview

The objective of this Programme is to provide students with a combination of knowledge, hands-on experience, and application of theory to information issues. The Programme keeps pace with changing technology and related business practices. The curriculum emphasizes quantitative and communications skills as well as providing a foundation in business environments.

Graduates of this Programme will qualify for employment in the computer software applications, computer and information systems, computer systems and computer systems software.

Programme Outline

No	Course Title
1	Technical Communication
2	Engineering Mathematics
3	Fundamentals of Information Technology
4	Operating Systems & Application Software
5	Information Systems Management
6	E-Commerce
7	System Analysis and Design
8	Computer Networking
9	Programming C++

Entry Requirement

High School Certificate or its equivalent

International Diploma in Hospitality & Tourism Management

Programme Overview

This programme is designed to provide students with the principles, skills, competencies, and professional attitudes which are essential for them to fulfill future management roles in the hospitality or tourism industries.
